# ARIAL SOFT

Arial Soft shank provides light support to the arch and is ideal for dancers with tight ligaments or an underdeveloped arch. In most cases, a "beginner" who is starting pointe work will be best served with a soft shank. The minimal support provided by a soft shank will allow the dancer to stretch their ligaments to enable the dancer to stand fully "on top" of their platform. In other cases, a "seasoned" dancer with very tight ligaments may continue to wear a soft shank.
